

2a

ALL ON A SUMMER'S DAY

- 2 children **were rescued** (rescue) by the Lifeboat;
- 27 people **were taken** (take) to hospital;
- 39 children **were lost** (lose) and found (find);
- 60 tons of rubbish **were cleaned** (clean) from the streets and beach;
- 900 kg of coins **were fed** (feed) into machines;
- 21,000 packets of toilet paper **were used** (use);
- 100,000 portions of fish and chips **were bought** (buy);
- 450,000 ice creams **were sold** (sell);
- 500,000 (=half a million) eggs **were served** (serve).

2 b

Ask questions about a summer's day in Blackpool, using *How many*.

1. How many people were taken to hospital?
2. How many children were lost and found?
3. How many tons of rubbish were cleaned from the streets and beach?
4. How many kilos of coins were fed into machines?
5. How many packets of toilet paper were used?
6. How many portions of fish and chips were bought?
7. How many ice creams were sold?
8. How many eggs were served?

8,540 KM FOR A POT OF EUROPEAN YOGHURT

For this pot of yoghurt 8,540 km **were made** (*make*).

It can't be true, but it is!

Look!

The yoghurt **was made** (*make*) in Germany.

The kiwis **were imported** (*import*) from Italy.

The gooseberries **were imported** (*import*) from Austria.

The plastic pots **were imported** (*import*) from France.

Then the yoghurt **was exported** (*export*) to Britain,
where it **was sold** (*sell*) and **eaten** (*eat*).

What do you think? Not very "green", is it?
